

oneIDentity+

Beyond Authenticity Check

Product piracy, digitalization and Industry 4.0 are challenges affecting all manufacturers and markets.

oneIDentity+ helps you to face them..

Check out the oneIDentity+ App!

Product piracy endangers end customers, damages a brand's image and leads to loss of sales. As part of the initiative "Manufacturers against Product Piracy" (MAPP), renowned automobile suppliers are carrying the fight to product counterfeiters. As a measure to distinguish genuine products from fakes, all participating manufacturers mark their original products with a GS1 accordant data matrix code. This unique MAPP code can be checked with oneIDentity+ – worldwide, 24 hours a day. But oneIDentity+ offers much more. It is a manufacturer-independent service platform to support role-specific mobile processes and enable the display of marketing, product and maintenance information or the connection to customer loyalty systems.

Who can use oneIDentity+?

- The oneIDentity+ iOS and Android App is available for everybody, worldwide and is free of charge.
- While non-registered App users can use it mainly to check the authenticity of products and machinery marked with MAPP codes, registered users like mechanics in garages, customs officers, service and logistics employees profit from additional value-added services.
- Authenticity checks can also be carried out at www.one-identity-plus.com and several manufacturer webpages by manually entering the MAPP code.

What does oneIDentity+ offer?

Market-wide, manufacturer-independent authenticity check – available around the clock, worldwide and free of charge

A range of manufacturer and role-specific value-added services to display fitting instructions, link customer loyalty systems, etc.

One single system to check products from different manufacturers (without requiring knowledge of producer-specific security features)

Display of check results in different languages incl. manufacturer and GTIN-specific response texts

Optional display of additional product and marketing information

Integrated "Report Counterfeit" function to directly contact the manufacturer in the event of questionable articles

Comprehensive statistical evaluations of all MAPP code checks for the manufacturer

Authentication

Product & brand protection

Counterfeit protection

Product piracy

Value Added Services

Track & Trace

Solution Partner
oneIDentity+

The service at a glance

Why oneIDentity+?

- Central access to a standardized, neutral, manufacturer-independent service platform for the whole market
- Supports role-specific, digital and mobile processes based on serialised products
- Comprehensive, ready-to-use software components and interfaces for fast implementation of manufacturer and rolespecific value-added services for traceability, information display, etc.
- Software Development Kit to integrate the oneIDentity+ functionality in manufacturer websites and apps

To install the oneIDentity+ App use the QR code at the bottom. For details about the MAPP initiative visit www.mapp-code.com
